Raptors warriors game score live

To keep score in arrows, make a side of board for each player, and write each player's notes on each row. Subtract each score from a base number, usually 501, until a player brings his score down to zero and win the game. Learn to play the dartboard! Each gets three throws per turn. The sections of the outer ring are equal to double the number — written as D20 or D10 — that each person is associated with. Time and black triangular sections are equal to the number that each one is associated with. The sections of the inner ring are equal to triple the number — written as T20 or T10 — that each person is associated with. The green ring around the bullseye is equal to 25, while the bullseye itself equals to 50. **Draw a line down the middle of a piece of paper, preferably lined paper. Put the name of a player on one side and the other player's name on the other side.** Draw a line down the middle every half. Record notes in the top of a half, and write Total at the top of the other half. On the side, write the numbers one across 10 represent each turn, and add more turns as needed. Catch tallyStart every player at 501, and subtract notes the first turn at that number. Keep taking turns until someone brings the scores down to zero.
